PERSONAL SUMMARY

Fullstack Engineer with 4+ years of experience building and optimizing scalable backend services, APIs, and e-commerce platforms. Strong experience with Go, Python, REST APIs, GraphQL, distributed systems, performance optimization, and modern web architectures.

PROFESSIONAL EXPERIENCE

ADEPTMIND **Bangalore, KA**

Engineering **06/2024 - Present**

Adeptmind leverages Gen AI and deep intent mining to transform retail search and discovery—bridging the gap between physical products and digital shoppers through AI-driven optimization.

- **Developed the dlp-endpoints service from scratch using Go**, transitioning performance-critical APIs that previously had ~1.8s latency, reducing response times dramatically and improving client satisfaction.
- Worked on improving **Core Web Vitals** and UI performance for major clients such as **Foot Locker, Gap, Lululemon, and Decathlon** and more implementing SEO optimizations that improved page speed by approximately **60%** and contributed to client growth. Also worked on **indexing and crawling optimizations** to improve search engine discoverability and page performance.
- **Enhanced DLP Platform** with backend improvements including Interlink Optimization in Chat-DLP, enabling richer interlink structures for better data linking and discoverability.
- Implemented an AI-driven interlink system using **OpenAI embeddings** to dynamically generate multi-ratio interlinks between CLP, DLP, and PDP pages, optimizing search performance and page relationships.
- **Led frontend revamp** by introducing reusable templates for FAQ and 404 pages, accelerating new client onboarding and enhancing SEO rankings.
- Integrated **Framer Motion animations** for smooth transitions, improving user engagement and visibility in **AI Overviews**.
- **Owned and delivered DLP SLA targets**, resolving **~40 tickets in 2 months** while simultaneously being on **Engineering Support** for over 2 months, ensuring stability and prompt issue resolution.
- **Mentored and onboarded juniors**, providing detailed **KT sessions**, daily guidance, and regular feedback, successfully transitioning them to full-time engineers.

PLIVO **Bangalore, KA**

SDE | Founding Team **06/2022 - 05/2024**

Contacto (a subsidiary of Myntra) is a product solution that enables businesses to set up their contact center with a few button clicks and drag and drop functionality.

- Converted an Electron.js desktop application into a **browser-based application**, implementing WebSockets and browser communication APIs for real-time functionality.
- Improved customer workflow efficiency by approximately **50%** by eliminating platform switching and reducing multiple-login requirements.
- Independently designed and delivered major product capabilities including **Email and WhatsApp communication channels, Agent Monitoring, and Agent Barging**.

- Migrated **Create React App to Vite**, reducing development iteration time by approximately **2x** through faster HMR and improving build performance.
- Worked across frontend and backend integrations to establish reliable communication between customer-facing applications and backend services.
- Designed and integrated **REST and GraphQL APIs** between backend services and frontend applications to support seamless application workflows.
- Developed and maintained scalable **backend services and APIs** using **Go (Gin) and Python**, supporting contact-center and customer-facing application workflows.
- Built and maintained backend modules using **Go and the Gin framework**, designing service architecture and data models backed by **PostgreSQL**.
- Worked on **agent, conversation, and channel-related functionality**, including **PostgreSQL schema design and query optimization**.
- Built **Python** services and scripts for automation, data processing, and internal tooling based on business and product requirements.
- Participated in **performance tuning, debugging, unit testing, code reviews, and production issue resolution** for Go and Python services.
- Collaborated with frontend engineers, business stakeholders, QA, and technical teams to design and deliver product functionality.

KREDX **Bangalore, KA**
SDE **06/2021 - 06/2022**

- **Integrated single SPA package for Micro FrontEnd** architecture of entire repos, Which help in reducing deployment time and independent task on single feature by **multiple developers by 60%**
- Designed and implemented Server-driven forms for vendor onboarding where it dynamically adapts to backend response and Developed a central doc upload module that allowed all teams to reuse upload and maker-checker functionality.
- Implemented a GraphQL code generator for auto-generating types, leading to a reduction in writing buggy code.
- **Achieved 60% test coverage** for the entire Capvel repository.

GOODHEALTH **Bangalore, KA**
SDE | Founding Team **05/2020 - 04/2021**

- Created the entire website from scratch using design libraries such as Ant Design. Optimized user experience (UX) by implementing lazy loading, Brotli for asset compression, and progressive image loading. Additionally, incorporated parallax effects for an attractive and animated UI.
- During development made sure the website is accessible in all the devices and meets PWA requirements if required in future.

EDUCATION

LOVELY PROFESSIONAL UNIVERSITY **Jalandhar, Punjab**
B.tech in Computer Science and Engineering **2017-2021**

- CGPA: 8/10

ADDITIONAL INFORMATION

- **Backend:** Go, Gin, Python, FastAPI, Node.js, REST APIs, GraphQL
  Frontend: JavaScript, TypeScript, React.js, Next.js, Vue.js, Redux
  Architecture: Microservices, Microfrontends, Server-Driven UI, API Design, Distributed Systems
  Databases & Storage: PostgreSQL, Redis, Snowflake, Google Cloud Storage
  Cloud & Infrastructure: AWS, GCP, CI/CD, Webpack, Vite
  Testing & Quality: Unit Testing, Integration Testing, Test Automation, Code Reviews
  E-commerce & AI: E-commerce Search, Product Discovery, OpenAI APIs, Embeddings, Agentic AI
  Other: Electron.js, Storybook, Material UI, Monorepo, Lerna
- **Languages**: English(Full Professional Proficiency), Hindi(Native or Bilingual Proficiency)
- **Achievements**: Problem Solver of the year 2023, Plivo, Attended 20 SSB(Service Selection Board) Bhopal, Indian Army, Represented State under 17, Badminton
